Complex Problem Solving 2014-04-04

this volume presents a state of the science review of the most promising current european research and its historic roots of research on complex problem solving cps in europe it is an attempt to close the knowledge gap among american scholars regarding the european approach to understanding cps although most of the american researchers are well aware of the fact that cps has been a very active research area in europe for quite some time they do not know any specifics about even the most important research part of the reason for this lack of knowledge is undoubtedly the fact that european researchers for the most part have been rather reluctant to publish their work in english language journals the book concentrates on european research because the basic approach european scholars have taken to studying cps is very different from one taken by north american researchers traditionally american scholars have been studying cps in natural domains physics reading writing and chess playing concentrating primarily on exploring novice expert differences and the acquisition of a complex skill european scholars in contrast have been primarily concerned with problem solving behavior in artificially generated mostly computerized complex systems while the american approach has the advantage of high external validity the european approach has the advantage of system variables that can be systematically manipulated to reveal the effects of system parameters on cps behavior the two approaches are thus best viewed as complementing each other this volume contains contributions from four european countries sweden switzerland great britain and germany as such it accurately represents the bulk of empirical research on cps which has been conducted in europe an international cooperation started two years ago with the goal of bringing the european research on complex problem solving to the awareness of american scholars a direct result of that effort the contributions to this book are both informative and comprehensive
