**The Press in Japan Today** 1961 this meticulous book submits research and the research process to deep scrutiny it debunks the unhelpful dichotomy between quantitative and qualitative research and highlights the great value of multi method and interactive research approaches that have greatly deepened our thinking professor adrian payne university of new south wales australia professor pennie frow university of sydney setting out to dispel the argument that case study research lacks the science theory and therefore validity of other forms of research evert gummesson combines many decades of experience as both a renowned scholar and a reflective practitioner to effectively bridge the divide between case theory and how it is applied in practice bringing the fundamental strengths of cases to the fore gummesson introduces the case theory concept as an expanded version of case study research which includes both methodology and the types of results that emerge by guiding the reader in the theoretical and philosophical underpinning demonstrating how to translate theory to pertinent research practice that address the real and consequential issues in business and management today this book will appeal to students academics and researchers who are interested in the science and philosophy behind case study research as well as the methodology and a thought provoking read for anyone who wants to be challenged about their belief of case study theory

**Case Theory in Business and Management** 2017-01-25 the accelerating transport innovation revolution a global case study based assessment of current experience cross sectorial effects and socioeconomic transformations offers a comprehensive view of current state of the art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results it offers a fascinating new model of the innovation process based on theories of biological ecosystems general systems theory and basins of attraction represented through space time graphs well known in mathematics

furthermore it considers through a number of dedicated chapters key issues and elements of innovation ecosystems such as causal factors and system constraints affecting the development and sustainability of innovation ecosystems chapter 4 review of innovation organization and governance in key countries and regions chapter 5 the role of technological spillovers chapter 6 collection and use of data for innovation monitoring and benchmarking chapter 7 intellectual property protection between competing ecosystems chapter 8 economics of innovation chapter 9 public and private sector involvement in transport innovation creation chapter 10 the role of the individual entrepreneur innovator in energizing change chapter 11 finally in chapter 12 there is a thorough summary of key findings this book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model it therefore includes ten case studies from the u s europe and asia detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned it does this effectively at five different levels of analysis i e the individual innovator entrepreneur level the organization level government agency or company the regional ecosystem level the nation state level and the global systemic or international level each level of analysis reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation especially on a revolutionary scale the need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years especially in the public sector there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large scale revolutionary change as the future unfolds thus a primary theme of the book is that understanding how research results translate into market innovation and implementation especially understanding the nature of revolutionary innovation is as important as the creation of innovations themselves while the focus of the book is on transportation the concepts and recommendations presented apply to other fields too formulates and presents a workable and comprehensive new model of innovation defines and analyzes many concepts and notions related to innovation research and market implementation examines the critical factors affecting innovation production and successful commercial implementation of research results examines organizational models of coordination governance data collection process analysis and use of intellectual property tools includes recent well researched and documented case studies of successful innovation ecosystems across the world mainly but not only in the transport field
