learning how to die can teach us how to live all of the world s religions refer to death in some way everyone is somewhat familiar with stories about where we go or what happens to us after death from an early age we have all heard stories of heaven or hell or some other version of paradise many of us believed such stories and a great number of us still do when considering that such stories manage to persist in modern times an age of science and logic we can be sure that death is an issue to which humans attach great importance in a sense the idea of an afterlife can be a great source of comfort to those whose death is imminent as well as to their loved ones those who have led especially difficult lives can look forward to a more pleasant world while those who have enjoyed happiness and abundance have the chance to experience more good fortune to those left behind the idea of an afterlife presents the chance to meet a loved one again we may not be conscious of it but such hopes and expectations stay with us throughout our lives if such an afterlife does exist then there is no reason to avoid or fear death moreover if we believe that another life awaits us then we would believe that we are only separated from our loved ones temporarily before being reunited with them later on

death is something we mourn or fear as the worst thing that could happen whether the deaths of close ones the deaths of strangers in reported accidents or tragedies or our own and yet being dead is something that no one can experience and live to describe this simple truth raises a host of difficult philosophical questions about the negativity surrounding our sense of death and how and for whom exactly it is harmful the question of whether death is bad has occupied philosophers for centuries and the debate emerging in philosophical literature is referred to as the badness of death are deaths primarily negative for the survivors or does death also affect the deceased what are the differences between death in fetal life just after birth or in adolescence in order to properly evaluate deaths in global health we must find answers to these questions in this volume leading philosophers medical doctors and economists discuss different views on how to evaluate death and its relevance for health policy this includes theories about the harm of death and its connections to population level bioethics for example one of the standard views in global health is that newborn deaths are among the worst types of death yet stillbirths are neglected this raises difficult questions about why birth is so significant and several of the book s authors challenge this standard view this is the first volume to connect philosophical discussions on the harm of death with discussions on population health adjusting the ways in which death is evaluated changing these evaluations has consequences for how we prioritize different health programs that affect individuals at different ages as well as how we understand inequality in health

religious studies throughout the contributors struggle to reconcile inconsistencies and gaps in our traditional understanding of death and to respond to the public's concern that in the determination of death under current policies patients' interests may be compromised by the demand for organ retrieval. Their questions about the philosophical and scientific bases for determining death lead inevitably to more profound questions of social policy, acknowledging that the definition of death is as much a social construct as a scientific one. The authors in their analysis of these issues provide a comprehensive and provocative source of information for students and scholars alike.

Did you know that American burial traditions include aerial burial in which the body is placed in tree branches? Have you ever wondered which religions believe in afterlife or reincarnation? Ever been curious about exactly what the embalming process entails? The answers all lie in *RIP: The Complete Book of Death, Dying, and Burial* by Constance Jones. Reminding us that almost no subject in the world elicits such universal fascination as death, Jones has masterfully collected information from diverse sources to explore, illuminate, demystify, and enrich our understanding of the myriad issues related to death and dying. Publishers Weekly has praised Jones' approach as clear-sighted and fearlessly inquisitive and calls *RIP* "the complete book of death, dying, and burial, invaluable and oddly uplifting." The book is divided into two parts and is equipped with a resource list of organizations, a bibliography, and an index. Part one explores the cultural dimensions of death and dying, with chapters and sections on myths and legends, explaining death, cultural traditions, the scientific study of death, demographic statistics, funerary customs, religious beliefs, and historical anecdotes. Jones provides wide-ranging, informative, and occasionally humorous material that is thoughtfully and clearly organized. Topics covered include descriptions of the physiological changes at the moment of death, a history of cremation, and summaries of legal and ethical issues associated with death, such as capital punishment, euthanasia, and suicide.

## **The Definition of Death 1985**

While many books are written on Jesus' death, a gap exists in writings about the theological significance of a believer's death, particularly in imitation of Jesus. Paul, as a first apostolic witness who talked frequently about his own death, serves as a foundational model for how believers perceive their own death. While many have commented about Paul's stance on topics such as forensic righteousness and substitutionary atonement, less is written about Paul's personal experience and anticipation of his own death and the merit he assigned to it. Paul and his mortality: imitating Christ in the face of death explores how Paul faced his death in light of a ministry philosophy of imitation as he sought to imitate Christ in his life. So he would imitate Christ as he faced his death, in his writings Paul acknowledged his vulnerability to passive death as a mortal that at any moment he might die or come near death. He gave us some of the most mournful and vitriolic words about how death is God's and our enemy, but he also spoke openly about choosing death. My aim is to know him to be like him in his death. This study seeks to show that Paul embraced death as a follower and imitator of Christ because the benefits of a good death supersede attempts at self-preservation for him. Embracing death is gain because it is honorable because it reflects ultimate obedience to God and because it is the reasonable response for those who understand that only Jesus' death provides atonement. Studying mortality is paradoxically a study of life: peering at the prospect of life's end energizes life in the present. This urgency focuses on living

with mission in step with god the creator and sustainer of life who is rightly referred to as life itself by focusing on mortality we focus on paul s theology of life in its practical aspects in particular living life qualitatively aware of god s kingdom and mission and our limited quantity of days
