China's Crisis of Success

2018-01-11

explores how china has reached a threshold where continued success requires re invention of its economy and politics

The Power of Crisis

2022-05-17

renowned political scientist ian bremmer draws lessons from global challenges of the past 100 years including the pandemic to show how we can respond to three great crises unfolding over the next decade in this revelatory unnerving and ultimately hopeful book bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises global health emergencies transformative climate change and the ai revolution today americans cannot reach consensus on any significant political issue and us and chinese leaders behave as if they re locked in a new cold war we are squandering opportunities to meet the challenges that will soon confront us all in coming years humanity will face viruses deadlier and more infectious than covid intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives most dangerous of all new technologies will reshape the geopolitical order disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications the good news some farsighted political leaders business decision makers and individual citizens are already collaborating to tackle all these crises the question that should keep us awake is whether they will work well and quickly enough to limit the fallout and most importantly whether we can use these crises to innovate our way toward a better world drawing on strategies both time honored and cutting edge from the marshall plan to the green new deal the power of crisis provides a roadmap for surviving even thriving in the 21st century bremmer shows governments corporations and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th century globalism promised but failed to deliver

The General Crisis of the Seventeenth Century

2005-08-12

one of the most fierce and wide ranging debates in historical circles during the last twenty years has concerned the theory that throughout europe the seventeenth century was a period of crisis so pervasive significant and intense that it could be labelled a general crisis a

2017-12-26

a world in disarray american foreign policy
and the crisis of the old order

number of articles stimulated by the debate were collected and published in a book entitled crisis in europe edited by trevor aston this volume takes the still acrimonious debate up to the present day the editors have collected together ten important subsequent essays concerning the social economic and political crises which affected not only europe but also asia in the mid seventeenth century all the pieces are essential reading for a clear understanding of the period this new edition of the general crisis of the seventeenth century contains fresh research new perspectives and completely updated bibliographies and index

The Palgrave Handbook of EU Crises

2020-12-21

this handbook comprehensively explores the european union s institutional and policy responses to crises across policy domains and institutions including the euro crisis brexit the ukraine crisis the refugee crisis as well as the global health crisis resulting from covid 19 it contributes to our understanding of how crisis affects institutional change and continuity decision making behavior and processes and public policy making it offers a systematic discussion of how the existing repertoire of theories understand crisis and how well they capture times of unrest and events of disintegration more generally the handbook looks at how public organizations cope with crises and thus probes how sustainable and resilient public organizations are in times of crisis and unrest

Aftershocks

2009

aftershocks was written in the midst of the deepest economic crisis since the great depression although it would be premature to presume to identify the repercussions of the crisis it is clear that it will have profound aftershock effects in the political economic and social spheres the book contains essays based on semi structured interviews with leading scholars european politicians and representatives from the world of business they reflect on the origins of the crisis as well as the possible social economic and political transformations it may engender publisher s description

A Crisis of Beliefs

2020-03-10

how investor expectations move markets and the economy the collapse of lehman brothers in september 2008 caught markets and regulators by surprise although the government rushed to rescue other financial institutions from a similar fate after lehman it could not prevent the deepest recession in postwar history a crisis of beliefs makes us rethink the financial crisis and the nature of economic risk in this authoritative and comprehensive book two of today s most insightful economists reveal how our beliefs shape financial markets lead to expansions of credit and leverage and expose the economy to major risks nicola gennaioli and andrei shleifer carefully walk readers through the unraveling of lehman brothers and the ensuing meltdown of the us financial system and then present new evidence to illustrate the destabilizing role played by the beliefs of home buyers investors and regulators using the latest research in psychology and behavioral economics they present a new theory of belief formation that explains why the financial crisis came as such a shock to so many people and how financial and economic instability persist a must read for anyone seeking insights into financial markets a crisis of beliefs shows how even the smartest market participants and regulators did not fully appreciate the extent of economic risk and offers a new framework for understanding today s unpredictable financial waters

Road to Recovery

2010-08-03

singapore had been one of the nations severely affected by the 2008 09 global financial and economic crisis the city state came under pressure through the financial trade and confidence channels to counter these shocks singapore policymakers undertook unprecedented monetary and fiscal policy measures they subsequently charted a revival strategy that would help the country emerge stronger after the crisis these all encompassing policies together with the global economic recovery in 2009 helped the city state bounce back faster and stronger than many other regional economies this book provides an insight into the events that occurred during the crisis and singapore s successful navigation to economic recovery although much has been written about the global financial crisis of 2008 09 not enough has been said about how it affected singapore and the policy response in this highly readable book sanchita basu das fills this gap explaining how the crisis rippled through the singapore economy via trade channels the financial sector and asset markets but the greatest strength of this volume is its comprehensive account of the extraordinary measures singapore put in place to deal pre emptively with what could have been huge declines in output and employment in the face of the collapse of trade and credit flows singapore s multi pronged approach and especially the fiscal support and loan guarantees contained in the 2009 budget must go down as one of the boldest and most creative policy responses to a crisis it is a valuable lesson to economics students and practitioners alike this book gives you the full story vikram khanna associate editor the business times sanchita basu das is to be congratulated for providing a fascinating accessible and forward looking analysis of singapore s response to the global economic crisis of 2008 09 as a highly trade dependent economy singapore was hit hard by these events but the government was nimble and quick to react the author describes and evaluates this

a world in disarray american foreign policy
and the crisis of the old order

it seems every day we encounter a crisis or difficult issue of some sort that affects our work such difficulties can come from within work eg a difficult client or boss missing a target or deadline rejection of a proposal or plan feeling undervalued or outside of it eg personal issues such as family relationships debt alcohol all have the potential to trigger stress anxiety and lead to crisis mode this practical book offers strategies and guidance to coping with and surviving a range of crisis moments and issues that affect our ability to perform at work written by expert coaches the book helps anyone to develop a series of competencies in order to help us manage crisis points and improve our personal resilience lid publishing s popular concise advice lab notebooks are designed to be quick and comprehensive brainstorming tools and skill building resources for busy professionals the small trim size makes it easy to take along in a briefcase or purse interior pages are matte finish so ink won t smear and there s plenty of space to jot notes a ribbon makes it easy to mark your place and the elastic outer band keeps the notebook closed

Global Crises and the Crisis of Global Leadership

2011-10-20

this groundbreaking collection on global leadership features innovative and critical perspectives by scholars from international relations political economy medicine law and philosophy from north and south the book s novel theorization of global leadership is situated historically within the classics of modern political theory and sociology relating it to the crisis of global capitalism today contributors reflect on the multiple political economic social ecological and ethical crises that constitute our current global predicament the book suggests that there is an overarching condition of global organic crisis which shapes the political and organizational responses of the dominant global leadership and of various subaltern forces contributors argue that to meaningfully address the challenges of the global crisis will require far more effective inclusive and legitimate forms of global leadership and global governance than have characterized the neoliberal era

The Age of Crisis

2021-09-27

this book offers an analysis of the causes development and likely consequences of the covid 19 pandemic for global neoliberalism the analysis will draw upon the author s previous work on neoliberalism and on its twin crises the economic crisis the global financial crisis gfc ongoing since 2007 and subsequently the crisis of political democracy that has been associated with the rise of spectacular authoritarian leaders in several countries the approach is grounded on marxist political economy the book argues that the covid 19 pandemic emerges out of this context of deep inequalities and crises in the economy and in politics and it is likely to reinforce the exclusionary tendencies of

neoliberalism with detrimental implications both for economic prosperity and for democracy in turn the pandemic has revealed the limitations of neoliberalism like never before with implications for the legitimacy of capitalism itself and opening unprecedented spaces for the left this book will be of interest to academics in economics international relations political science political economy sociology and development studies

The Crisis of the French Section, 1935-36

1977

a rare analytical look at the financial crisis using simple analysis the economic crisis that began in 2008 revealed the numerous problems in our financial system from the way mortgage loans were produced to the way wall street banks leveraged themselves curiously enough however most of the reasons for the banking collapse are very similar to the reasons that long term capital management Itcm the largest hedge fund to date collapsed in 1998 the crisis of crowding looks at Itcm in greater detail with new information for a more accurate perspective examining how the subsequent hedge funds started by meriwether and former partners were destroyed again by the lapse of judgement in allowing lehman brothers to fail covering the lessons that were ignored during Itcm s collapse but eventually connected to the financial crisis of 2008 the book presents a series of lessons for hedge funds and financial markets including touching upon the circle of greed from homeowners to real estate agents to politicians to wall street guides the reader through the real story of long term capital management with accurate descriptions previously unpublished data and interviews describes the lessons that hedge funds as well as the market should have learned from Itcm s collapse explores how the financial crisis and Itcm are a global phenomena rooted in failures to account for risk in crowded spaces with leverage explains why quantitative finance is essential for every financial institution from risk management to valuation modeling to algorithmic trading is filled with simple quantitative analysis about the financial crisis from the quant crisis of 2007 to the failure of lehman brothers to the flash crash of 2010 a unique blend of storytelling and sound quantitative analysis the crisis of crowding is one of the first books to offer an analytical look at the financial crisis rather than just an account of what happened also included are a layman s guide to the dodd frank rules and what it means for the future as well as an evaluation of the fed s reaction to the crisis qe1 qe2 and qe3

The Crisis of Crowding

2012-07-31

economic changes and political changes which emerged with the modern capitalist world economy were accompanied in the sociocultural

domain by changes in the structures of knowledge these included the hierarchical separation of the realm of facts from that of values institutionalized as a division between the sciences and the humanities the social sciences responded to contradictions inherent in this structure over the nineteenth century in producing knowledge on which policy decisions could be based the problems of the contemporary period indicate we are in a long term structural crisis nowhere is this more apparent than in the theoretical frameworks and methodological approaches through which social analysts and observers alike seek to understand the world since the 1960s developments in the field of knowledge especially two movements complexity studies in the natural sciences and cultural studies in the humanities have contested the naturalized essentialist boundaries separating the sciences the social sciences and the humanities the primary rationale for this work is to recognize the inseparable whole composed of the material structures of the world and the structures of knowledge that govern what actions may be deemed legitimate and effective knowledge matters discusses what actions will actually be undertaken by social agents and what such an approach means for an analysis of the present situation in terms of imagining and evaluating possible futures

Knowledge Matters

2017-07-05

simulating for a crisis is far more than creating a simulation of a crisis situation in order for a simulation to be useful during a crisis it should be created within the space of a few days to allow decision makers to use it as quickly as possible furthermore during a crisis the aim is not to optimize just one factor but to balance various interdependent aspects of life in the covid 19 crisis decisions had to be made concerning e g whether to close schools and restaurants and the economic consequences of a 3 or 4 week lock down had to be considered as such rather than one simulation focusing on a very limited aspect a framework allowing the simulation of several different scenarios focusing on different aspects of the crisis was required moreover the results of the simulations needed to be easily understandable and explainable if a simulation indicates that closing schools has no effect this can only be used if the decision makers can explain why this is the case this book describes how a simulation framework was created for the covid 19 crisis and demonstrates how it was used to simulate a wide range of scenarios that were relevant for decision makers at the time it also discusses the usefulness of the approach and explains the decisions that had to be made along the way as well as the trade offs lastly the book examines the lessons learned and the directions for the further development of social simulation frameworks to make them better suited to crisis situations and to foster a more resilient society

Social Simulation for a Crisis

2021-06-08

seminar paper from the year 2014 in the subject economics history grade 1 7 university of applied sciences essen course economics language english abstract the great depression was one of the worst economic crises in the history of man kind all former great powers suffered from high debts and unemployment the united states got hit very hard because of the connection to debt countries which were additionally indebted among each other like germany great britain and france the reasons for the severe effects on the united states can be found in the several fields of economics the presidents herbert hoover and franklin d roosevelt dominated the u s re sponse to the great depression both presidents had different point of views on the crises from where they initiated fiscal monetary and social programs it was not easy to convince the people of tough measures in times of increasing distrust into economy the lack of public support in combination with less successful initiatives is one of the reasons why hoover failed in the election all identified lessons learned are not a blueprint for further recessions the political context and the scientific basis have a decisive impact governments businesses and consumers are responsible for a stable economic environment profit has to be on a sustainable basis flanked by moderate monetary measures

World Economic Crisis of the 1920s

2014-08-25

from the author of the shifts and the shocks and one of the most influential writers on economics a reckoning with how and why the relationship between democracy and capitalism is coming undone we are living in an age when economic failings have shaken faith in global capitalism political failings have undermined trust in liberal democracy and in the very notion of truth the ties that ought to bind open markets to free and fair elections are being strained and rejected even in democracy s notional heartlands around the world democratic capitalism which depends on the determined separation of power from wealth is in crisis some now argue that capitalism is better without democracy others that democracy is better without capitalism this book is a forceful rejoinder to both views it analyses how the marriage between capitalism and democracy has become so fraught and yet insists that a divorce would be an almost unimaginable calamity martin wolf one of the wisest public voices on global affairs argues that for all its recent failings slowing growth increasing inequality widespread popular disillusion democratic capitalism though inherently fragile remains the best system we know for human flourishing capitalism and democracy are complementary opposites they need each other if either is to thrive wolf s superb exploration of their marriage shows us how citizenship and a shared faith in the common good are not romantic slogans but the essential foundation of our economic and political freedom

The Crisis of Democratic Capitalism

2023-02-02

with the dramatic changes in the global political scene many developing countries are re evaluating their economic and political priorities this reappraisal scrutinizes their dependence on specific commodities and the crisis into which this market has been thrown in the last decade this work relates the main theoretical and empirical issues in the collapse in commodity prices since 1980 a major cause of the third world economic crises to perceived conflicts of interest between developed and developing countries maizels continues his study by discussing the elements of a new approach to an effective commodity policy for the future he includes coverage of such major problems as the impact of commodity instability on the global economy market structure as well as synthetics and diversification this study will be of interest to academics and students of development economics and international trade as well as to policymakers in developing countries

Commodities in Crisis

1992

two crises different outcomes examines east asian policy reactions to the two major crises of the last fifteen years the global financial crisis of 2008 9 and the asian financial crisis of 1997 98 the calamity of the late 1990s saw a massive meltdown concentrated in east asia in stark contrast east asia avoided the worst effects of the lehman brothers collapse incurring relatively little damage when compared to the financial devastation unleashed on north america and europe much had changed across the intervening decade not least that china rather than japan had become the locomotive of regional growth and that the east asian economies had taken numerous steps to buffer their financial structures and regulatory regimes this time asia avoided disaster it bounced back quickly after the initial hit and has been growing in a resilient fashion ever since the authors of this book explain how the earlier financial crisis affected asian economies why government reactions differed so widely during that crisis and how asian economies weathered the great recession drawing on a mixture of single country expertise and comparative analysis they conclude by assessing the long term prospects that asian countries will continue their recent success contributors muhamad chatib basri minister of finance of the republic of indonesia and professor of economics at the university of indonesia yun han chu institute of political science academia sinica richard doner emory university barry naughton university of california san diego yasunobu okabe japan international cooperation agency research institute t j pempel university of california berkeley tom pepinsky cornell university keiichi tsunekawa national graduate institute for policy studies tokyo

Economy and the Future

2014

Dr. John Carvalho, former Harvard academician and winner of the United States National Research Service Award, is no stranger to the word crisis. As a scientist, scholar, and statesman, he has spent decades working on the front lines of biomedical and theoretical exploration, global health, and the worldwide human rights movement. *The Crisis of Our Time* is the astonishing memoir and discourse regarding his life's career and philosophy concerning the planet's most pressing problems, written in a way accessible to everyone. Carvalho, beginning with his passionate, poetic, and provocative first chapter, challenges us to discover that the disastrous external crises of our lives emanate from the unity of our conscious and subconscious experiences. Indeed, the great troubles afflicting humanity—war, infectious disease, economic recession, terrorism, family discord, psychological trauma, human rights violations, dilemmas that appear unsolvable—actually originate when, without truthful self-reflection, we glorify mediocrity rather than strive to excel, employing cutting-edge scientific information. Keen historical insight, extensive cultural experience, and profound philosophical analysis, Carvalho dissects our crises to elucidate why they perpetuate. In so doing, he introduces his theory of causal circular systems to reveal how causes feed off and exacerbate effects, which in turn reinforce those same causes, furthering his views. He explores global health, the example par excellence, as well as economics, political history, planetary climate change, and the most central crisis of all: being or nothingness, the fears of the self, the dread of our mortality. Ultimately, this short but eye-opening book creates epic meaning while using an artistic literary style that is virtually unseen in nonfiction. Anyone who genuinely seeks excellence over mediocrity, truth over falsity, meaning over purposelessness, and resolution over despair should read *Crisis*.

Two Crises, Different Outcomes

2015

Crisis of Authority analyzes the activities that draw together authority, trust, and truthfulness in contemporary theory and politics.

problem of implementing reforms during the economic crisis the given term paper contains the research about the reasons of success and failure of implementing economic reforms by some states of the euro zone especially in the times of crises the appropriate theoretical approaches are introduced as well as empirical examples of Italy in 1990s and Ireland in 2008 2010 are analyzed this all serve the base for the revealing of the reasons for success and failure of economic reforms by some states of the euro zone abstract despite of the fact that the market economy has demonstrated its superiority before the others types of economies it is still not protected from crises economic crises are usually connected with the end of business cycles but they can also take place by the negative state of economy or mistakes of governments in any case crises have negative influence on the electoral support of governments because voters have to accept such negative economic phenomena as unemployment inflation bankruptcy of banks and companies voters are inclined to blame governments and political actors with such problems the most popular form of response of governments to economic crises is the implementation of appropriate economic reforms some reforms can have negative consequences for voters and therefore for the electoral support and restrict some essential options of the welfare state nevertheless the examples from the current crisis of the euro zone as well as the examples from previous crises show that certain states implement reforms and therefore overcome crisis more successful than others in this way the problem of this term paper is the following one why are some count

Crisis of Authority

2013

something dramatic happened in the late summer and autumn of 2008 the post cold war world came to an abrupt end this was the result of two conjoined crises first in its brief war with Georgia in August 2008 Russia asserted its military power to halt the expansion of NATO to its very borders secondly on 15 September 2008 the Wall Street investment bank Lehman Brothers collapsed this precipitated a severe financial crash and helped to push the world economy into the worst slump since the 1930s both crises marked a severe setback for the global power of the United States which had driven NATO expansion and forced through the liberalization of financial markets more broadly they challenged the consensus that had reigned since the collapse of the Soviet bloc in 1989 that a US orchestrated liberal capitalist order could offer the world peace and prosperity already badly damaged by the Iraq debacle this consensus has now suffered potentially fatal blows in bonfire of illusions Alex Callinicos explores these twin crises he traces the credit crunch that developed in 2007-8 to a much more protracted crisis of overaccumulation and profitability that has gripped global capitalism since the late 1960s he also confronts the interaction between economic and geopolitical events highlighting the new assertiveness of nation states and analysing the tense complex relationship of interdependence and conflict that binds together the US and China finally in response to the revelation that the market is not the solution to the world's problems Callinicos reviews the prospects for alternatives to capitalism

Implementing Reforms During the Economic Crisis

2013-06

this book has a dual purpose first it analyses the concept of economic crises within economic theory showing the various theoretical foundations and controversies amongst different schools of economic thought second it presents an empirical analysis of the great recession in spain addressing the growth period of 1995 to 2007 08 the subsequent depression until 2013 14 and the recovery that followed it also shows the way in which the inner contradictions of capital manifests itself in an european peripheral economy under a real estate bubble emphasizing the role of the spanish economy in european capitalism this theoretical and empirical heterodox approach will be of interest to students and scholars in political economy and those with an interest in the eurozone

Bonfire of Illusions

2013-04-17

Preventing the Next Financial Crisis

2021-04-21

the crisis behind the euro crisis encourages dialogue among scholars across the social sciences in an attempt to challenge the narrative that regarded the euro crisis as an exceptional event it is suggested instead that the euro crisis along with the subsequent crises the eu has come to face was merely symptomatic of deeper systemic cracks this book s aim is to uncover that hidden systemic crisis the crisis behind the euro crisis under this reading it emerges that what needs to be questioned is not only the allegedly purely economic character of the euro crisis but more fundamentally its very classification as an emergency instead the euro crisis needs to be regarded as expressive of a chronic dysfunctional but normal condition of the eu by following this line of analysis this book illuminates not only the causes of contemporary turbulences in the european project but perhaps the true nature of the eu itself

only martyrs know neither pity nor fear believe me the day when the martyrs are victorious will be the day of universal conflagration jacques lacan made this gloomy prophesy back in 1959 but doesn't it also apply to our own time faced with a rise in attacks around the world can we really just blame the radicalization of islam what hope is there for the alienated youth as the wars that have ravaged the middle east spill out across the globe for alain bertho the mounting chaos we see today is above all driven by the weakening of states legitimacy under the pressure of globalization add to this the hypocrisy of the elites who beat the drum of security measures even as they sow the seeds of violence around the world this disorder is the swamp of despair which can only produce fresh atrocities today's youth are the lost children of neoliberal globalization the inheritors of the political and human chaos it produces when they find it easier to imagine the end of the world than the end of capitalism their revolt tends to take the paths of martyrdom and despair the closing of the revolutionary hypothesis allows only fury the answer bertho argues is a new radicalism able to inspire a collective hope in the future

The Crisis of the University

1984

this final volume on the history of christendom is concerned with the crises of the modern era the turning points in the diseases which plagued humanity during these two centuries the book discusses in detail nazi and japanese militarism and its crisis in world war ii the damage caused by the inhuman system of communism and its fall in 1989 and the origins and consequences of the denial of the dignity of the human person in the modern culture of death as did earlier volumes in this series the book reflects an unabashedly christian and catholic view of history taking as one of its major themes the centrality of the papacy to the destiny of the west carroll holds that god and individual men and women not impersonal social and economic forces make history

Public Administration and the Crisis of the State

1985

why stable banking systems are so rare why are banking systems unstable in so many countries but not in others the united states has had twelve systemic banking crises since 1840 while canada has had none the banking systems of mexico and brazil have not only been

crisis prone but have provided miniscule amounts of credit to business enterprises and households analyzing the political and banking history of the united kingdom the united states canada mexico and brazil through several centuries fragile by design demonstrates that chronic banking crises and scarce credit are not accidents calomiris and haber combine political history and economics to examine how coalitions of politicians bankers and other interest groups form why they endure and how they generate policies that determine who gets to be a banker who has access to credit and who pays for bank bailouts and rescues fragile by design is a revealing exploration of the ways that politics inevitably intrudes into bank regulation

The Crisis of Christendom

2013

as the twentieth century draws to a close it is time to look back on an epoch of widespread turmoil including two world wars the end of the colonial era in world history and a large number of international crises and conflicts this book is designed to shed light on the causes and consequences of military security crises since the end of world war i in every region across diverse economic and political regimes and cultures the primary aim of this volume is to uncover patterns of crises conflicts and wars and thereby to contribute to the advancement of international peace and world order the culmination of more than twenty years of research by michael brecher and jonathan wilkenfeld the book analyzes crucial themes about crisis conflict and war and presents systematic knowledge about more than 400 crises thirty one protracted conflicts and almost 900 state participants the authors explore many aspects of conflict including the ethnic dimension the effect of different kinds of political regimes notably the question whether democracies are more peaceful than authoritarian regimes and the role of violence in crisis management they employ both case studies and aggregate data analysis in a unified model of crisis to focus on two levels of analysis hostile interactions among states and the behavior of decision makers who must cope with the challenge posed by a threat to values time pressure and the increased likelihood that military hostilities will engulf them this book will appeal to scholars in

history political science sociology and economics as well as policy makers interested in the causes and effects of crises in international relations the rich data sets will serve researchers for years to come as they probe additional aspects of crisis conflict and war in international relations michael brecher is r b angus professor of political science mcgill university jonathan wilkenfeld is professor and chair of the department of government and politics university of maryland they are the coauthors of crises in the twentieth century a handbook of international crisis among other books and articles

Fragile by Design

2015-08-04

the constant threat of crises such as disasters riots and terrorist attacks poses a frightening challenge to western societies and governments while the causes and dynamics of these events have been widely studied we know little about what happens following their containment and the restoration of stability this volume explores post crisis politics examining how crises give birth to longer term dynamic processes of accountability and learning which are characterised by official investigations blame games political manoeuvring media scrutiny and crisis exploitation drawing from a wide range of contemporary crises including hurricane katrina 9 11 the madrid train bombings the walkerton water contamination space shuttles challenger and columbia and the boxing day asian tsunami this is a ground breaking volume which addresses the longer term impact of crisis induced politics competing pressures for stability and change mean that policies institutions and leaders may occasionally be uprooted but often survive largely intact

The Age of the Crisis of Man

2016-11-08

this book provides a timely warning of the dangers still present and building in the global economic system whose frailty was exposed by the global financial crisis and the eurozone crisis it spawned the contributors to this volume draw on speri s work on the political economy of growth stagnation austerity and crisis and placing each in the context of the wider environmental crisis
