Delmar Learning's Basic Life Support Video

2003-12

covers the topics of bleeding control shock management long bone fracture traction splinting hare and sager duration 20 minutes

Hemorrhagic Shock

2017

in this first version of the book hemorrhagic shock recognition pathophysiology and management the entire spectrum of hemorrhage in various pathologic conditions is explored with a particular emphasis on bleeding from injury world class experts have summarised their benchtop or clinical investigation of severe bleeding and the subsequent hosts response furthermore contemporary content experts have been assembled to relate their own clinical expertise flanked by literature consensus in the subject navigation through the different chapters reveals succinct discussions about epidemiology pathophysiology bedside assessment and laboratory investigations in addition an important part of the content is practical approaches to the management and or control of difficult hemorrhage sites including the diagnosis management adjunct pharmaceutical and operative options available for the care of these patients additionally separate chapters are presented for exploring areas related to bleeding in unique patients including maternal fetal medicine prehospital and austere environment settings finally the most novel and cutting edge materials adjuncts and pharmacological agents are discussed as well as a concerted vision of what the future is likely going to bring to the care of these patients the authorship reflects a multitude of backgrounds and disciplines all focused on mitigating the impact of hemorrhage and hemorrhagic shock in its multiple facets trainees advanced practice providers fellows attending surgeons traumatologists anesthesiologists emergency physicians and intensivists will find valuable information derived from the vast experiences of the authors and their concise presentation of the most current literature in this dynamic field

International Convergence of Capital Measurement and Capital Standards

2004

the first edition of this publication was aimed at defining the current concepts of trauma induced coagulopathy by critically analyzing the most up to date studies from a clinical and basic science perspective it served as a reference source for any clinician interested in reviewing the pathophysiology diagnosis and management of the coagulopathic trauma patient and the data that supports it by meticulously describing the methodology of most traditional as well as state of the art coagulation assays the reader is provided with a full understanding of the tests that are used to study trauma induced coagulopathy with the growing interest in understanding and managing coagulation in trauma this second edition has been expanded to 46 chapters from its original 35 to incorporate the massive global efforts in understanding diagnosing and treating trauma induced coagulopathy the evolving use of blood products as well as recently introduced hemostatic medications is reviewed in detail the text provides therapeutic strategies to treat specific coagulation abnormalities following severe injury which goes beyond the first edition that largely was based on describing the mechanisms causing coagulation abnormalities trauma induced coagulopathy 2nd edition is a valuable reference to clinicians that are faced with specific clinical challenges when managing

coagulopathy

Trauma Induced Coagulopathy

2020-10-12

this book is open access under a cc by 4 0 license it constitutes a unique source of knowledge and guidance for all healthcare workers who care for patients with sepsis and septic shock in resource limited settings more than eighty percent of the worldwide deaths related to sepsis occur in resource limited settings in low and middle income countries current international sepsis guidelines cannot be implemented without adaptations towards these settings mainly because of the difference in local resources and a different spectrum of infectious diseases causing sepsis this prompted members of the global intensive care working group of the european society of intensive care medicine esicm and the mahidol oxford tropical medicine research unit moru bangkok thailand among which the editors to develop with an international group of experts a comprehensive set of recommendations for the management of sepsis in resource limited settings recommendations are based on both current scientific evidence and clinical experience of clinicians working in resource limited settings the book includes an overview chapter outlining the current challenges and future directions of sepsis management as well as general recommendations on the structure and organization of intensive care services in resource limited settings specific recommendations on the recognition and management of patients with sepsis and septic shock in these settings are grouped into seven chapters the book provides evidence based practical guidance for doctors in low and middle income countries treating patients with sepsis and highlights areas for further research and discussion

Sepsis Management in Resource-limited Settings

2019-02-08

this book is an unparalleled source of cutting edge information on every aspect of rescue trauma management and fracture care in the polytrauma multiple injured patient damage control surgery is approached logically and systematically by dividing treatment into phases the common goal of treating life threatening conditions first then treating major pelvic and extremity fractures requires cooperation among all major disciplines and subspecialties involved in the care of polytrauma patients and the book is accordingly multidisciplinary in nature it is edited by pioneers in the field and the authors are all acclaimed experts this second revised and updated edition of damage control management in the polytrauma patient will be invaluable for all clinicians who must weigh life saving operations against limb threatening conditions including emergency personnel trauma surgeons orthopaedic traumatologists and anesthesiologists

Damage Control Management in the Polytrauma Patient

2017-04-04

terry regan who d dropped into the delaneys cabin up at blue jay lake to sell them a tv set took in the situation at a glance gilda was young and stunningly attractive jack delany was a vicious hard drinking cripple imprisoned in a wheelchair regan should have left them but he didn t

Shock Treatment

2012-09-06

this book is designed to offer the reader first rate guidance on shock management in the real world comprehensive evidence based and up to date instruction is provided on optimal care of patients with different types of shock septic hemorrhagic cardiogenic anaphylactic and obstructive at all stages from initial response through to icu admission as well as management the coverage encompasses pathophysiology clinical presentation diagnosis and emerging trends a further key feature is the use of a scenario based approach to present a series of cases based on real life experiences here a narrative style and q a form are employed to vividly convey scenarios that may be encountered in clinical practice and to elucidate decision making in complex circumstances when readers experience difficulty in answering the questions the earlier sections can be consulted to identify the correct response this book will be of great value for all health care professionals in particular it will be very helpful for novice or inexperienced practitioners in emergency medicine critical care medicine and traumatology

Essentials of Shock Management

2018-11-30

historically 20 of all injured combatants die on the battlefield before they can be evacuated to a field hospital blood loss is the single major cause of death among those killed in action whose lives might otherwise be saved fluid resuscitation and the treatment of hypovolemia the abnormally decreased volume of circulating fluid in the body offer the greatest opportunity for reducing mortality and morbidity associated with battlefield casualties in fluid resuscitation a committee of experts assess current resuscitation fluids and protocols for the treatment of combat casualties and make recommendations for future research chapters focus on the pathophysiology of acute hemorrhagic shock experience with and complications of fluid resuscitation novel approaches to the treatment of shock protocols of care at the site of injury and future directions for research the committee explicitly describes the similarities and differences between acute medical care during combat and civilian emergency trauma care fluid resuscitation should help energize and focus research in both civilian and military emergency care and help save the lives of citizens and soldiers alike

Fluid Resuscitation

1999-10-05

available separately and packaged with every textbook this handy pocket guide will serve as a valuable reference both in the classroom and in the field for years to come full of quick reference tables cpr and aed information airway management and breathing skills and a whole lot more rapid first responder will be a constant companion contents include anatomy review overview of patient assessment airway management and ventilation techniques cpr and aed techniques treatment for common medical emergencies overview of bleeding control and shock management management of musculoskeletal injuries childbirth and newborns ems operations common abbreviations and medications

A Study of Hypoglycaemic Shock Treatment of Schizophrenia

1937

this book focuses on endovascular methods for resuscitation and trauma management written by highly qualified and clinically active physicians from around the world it shares information gathered over the past decade providing a comprehensive database of clinical knowledge for a wide range of practicing clinicians and researchers moreover it describes basic methods for vascular access methods for reboa resuscitative endovascular balloon occlusion of the aorta endo grafts and embolization methods as well as other more advanced methods for endovascular and hybrid resuscitation cpr reboa echmo etc from the pre hospital to the post surgical phase as the body of literature in this field has grown considerably over the past five years the book also focuses on summarizing what is known what the clinical and research evidence is and how to actually use the various methods it will help readers understand basic and advanced modern techniques for bleeding control and modern resuscitation and how to apply them in clinical practice

Rapid First Responder

2003-07-01

diagnosis of organ hypoperfusion in patient with sepsis is not always straightforward which makes septic shock definition diagnosis and early treatment are major challenges that emergency physicians and intensivists must deal with in their daily practice normal blood pressure does not always mean good organ perfusion which means patient might develop septic shock yet they are not hypotensive there are several indices that could be used in combination to diagnose and manage hypoperfusion in patients with septic shock fluid resuscitation and vasopressor administration along with infection sources control are the cornerstones in septic shock management this chapter will cover indices that can be used to diagnose hypoperfusion type and amount of fluid and vasopressor that can be used in resuscitating septic shock patients

Endovascular Resuscitation and Trauma Management

2019-12-10

describes types of mind control such as cult conversion hypnosis prefrontal lobotomies brainwashing and electric shock treatment some of which are extremely controversial especially when applied against one's will

Assessment and Management of Hypoperfusion in Sepsis and Septic Shock

2022

radical technological changes so called technology shocks frequently disrupt the competitive market structure new entrants appear industries need to be redefined incumbents lose their positions or vanish completely fast moving industries like the often quoted example of the semiconductor industry have preferably been analyzed for these phenomena but do the findings hold for industries with longer development cycles like the global machine tool industry here multivariate analysis is used to find out what management needs to focus on in order to lead companies through the technology shocks the research for this book

builds on in depth interviews with 100 experts and decision makers from the machine tool industry involved in technology shocks and statistical analysis of detailed quantitative surveys collected from 58 companies in several instances the results challenge classical teaching of technology management adrian j slywotzky us top selling business author and one of the most distinguished intellectual leaders in business comments in technology shocks heinrich arnold develops a very useful model for analyzing technology shocks and for focusing on those factors that will enable a company to navigate through these shocks successfully and repeatedly although this work is focused on technology its thinking has useful implications beyond technology shocks it provides ideas that managers can use to protect their firms when they are faced with any type of discontinuity technology based or not

Demonstration Guide for Prevention of Electric Shock Injury

1969

mechanisms and standards exist to safeguard the health and welfare of the patient but for electroconvulsive therapy ect used to treat depression and other mental illnesses such approval methods have failed prescribed to thousands over the years public relations as opposed to medical trials have paved the way for this popular yet dangerous and controversial treatment option doctors of deception is a revealing history of ect or shock therapy in the united states told here for the first time through the examination of court records medical data fda reports industry claims her own experience as a patient of shock therapy and the stories of others andre exposes tactics used by the industry to promote ect as a responsible treatment when all the scientific evidence suggested otherwise as early as the 1940s scientific literature began reporting incidences of human and animal brain damage resulting from ect despite practitioner modifications deleterious effects on memory and cognition persisted rather than discontinue use of ect the 5 billion per year shock industry crafted a public relations campaign to improve ect s image during the 1970s and 1980s psychiatry s pr efforts misled the government the public and the media into believing that ect had made a comeback and was safe andre carefully intertwines stories of ect survivors and activists with legal ethical and scientific arguments to address issues of patient rights and psychiatric treatment echoing current debates about the use of psychopharmaceutical interventions shown to have debilitating side effects she candidly presents ect as a problematic therapy demanding greater scrutiny tighter control and full disclosure about its long term cognitive effects

A Study of Hypoglycaemic Shock Treatment in Schizophrenia

1936

this book provides concise and updated information on trauma consisting of current evidence based techniques practical guidelines and new concepts and advancements in the field including decision making from the golden hour to definitive treatment it can serve as a reference book for doctors and those sitting for professional examinations including general surgeons orthopaedic surgeons cardiothoracic surgeons anaesthesiologists neurosurgeons radiologists urologists intensivists and emergency physicians it is also suitable for medical students and nurses

Trauma

1966

sepsis is one of the most frequent complications in the surgical patient and one of the leading causes of mortality in intensive care units during the past two decades a great deal has been learned about surgical bacteriology antibiotic prophylaxis supportive management and the host response to microbial invasion sepsis can be caused by infection with gram negative bacteria gram positive bacteria fungi and particularly candida or viruses sepsis may also occur in the absence of detectable bacterial invasion and in these cases microbial toxins particularly gram negative bacterial endotoxin lipopolysaccharide lps and endogenous cytokine production have been implicated as initiators and mediators although activation of the immune system during microbial invasion is generally protective septic shock develops in a significant number of patients as a consequence of a poorly regulated immune response to the offending organism sepsis can be presented with a spectrum of severity septic shock represents the most severe form of host response to infection the aim of this monograph is to summarise the currently available data regarding epidemiology pathogenesis and optimal management of septic shock with a particular emphasis on the role of source control in sepsis emerging therapies for septic shock are also discussed

Mind Control

1985

this book provides a comprehensive overview of damage control resuscitation dcr an evidence based approach to the resuscitation of patients with severe life threatening hemorrhage lth it focuses on both civilian and military applications as dcr is utilized in civilian trauma situations as well as combat casualty care settings the book covers the history of fluid resuscitation for bleeding epidemiology of severe traumatic injuries prediction of life threatening hemorrhage pathophysiology and diagnosis of blood failure and permissive hypotension chapters provide in depth detail on hemostatic resuscitation principles dried plasma dried platelet surrogates and recent developments in frozen red blood cells and oxygen carriers the book also discusses how dcr principles can be used in a variety of situations such as when there are large numbers of patients with hemorrhagic lesions non trauma scenarios and on distinct populations such as children finally it concludes with a discussion of training and education methods for the implementation of dcr and remote dcr principles as well as learning healthcare system principles to facilitate the implementation of dcr and ultimately improve outcomes for patients with life threatening hemorrhage damage control resuscitation identification and treatment of life threatening hemorrhage is an essential resource for physicians and related professionals residents nurses and medical students in emergency medicine anesthesia surgery and critical care as well as civilian and military ems providers

Technology Shocks

2012-12-06

ending poverty and addressing climate change are the two defining issues of our time both are essential to achieving sustainable global development but they cannot be considered in isolation this report brings together these two overarching objectives and explores how they can be more easily achieved if considered together it demonstrates the urgency of efforts to reduce poverty and the vulnerability of poor people in the face of climate change it also provides guidance on how to ensure that climate change policies contribute to poverty reduction and poverty reduction policies contribute to climate change mitigation and resilience building

Doctors of Deception

2009-02-04

continued geographic expansion of dengue viruses and their mosquito vectors has seen the magnitude and frequency of epidemic dengue dengue hemorrhagic fever df dhf increase dramatically recent exciting research on dengue has resulted in major advances in our understanding of all aspects of the biology of these viruses and this updated second edition brings together leading research and clinical scientists to review dengue virus biology epidemiology entomology therapeutics vaccinology and clinical management

Protocol for Management of Suspected Anaphylactic Shock in Non-hospital Settings : Communicable Disease Control

2000

this manual provides a practical approach to operative trauma management written entirely by physicians who currently practice in shock trauma the manual features a hands on approach and practice to dealing with shock trauma that is regularly utilized by the faculty at the r adams cowley shock trauma center the volume includes numerous photographs that illustrate operative techniques in great detail the book is also presented in a manual format so that it fits easily into a white coat pocket making it a portable and readily accessible reference the shock trauma manual of operative techniques is a valuable resource for practicing surgeons in the community who cover the emergency department and thus may be called upon to provide operative

therapy for trauma residents particularly those in whom operative trauma is not a part of their training and fellows who are training in surgical critical care and trauma

A Control Strategy to Handle Shock Loadings to Wastewater Treatment Process

2008

a shock wave may be defined as a major issue that occurs close to a milestone while everything seems to be quiet this article provides practical suggestions for combining the science of project management especially the verification and control step for mitigating risk with the art of project management leadership skills in order to better manage shock waves and make the right decisions throughout the project life cycle

Current Practice and New Developments in Trauma

2021-11-29

china has become deeply integrated into the world economy yet gradual marketization has facilitated the country s rise without leading to its wholesale assimilation to global neoliberalism this book uncovers the fierce contest about economic reforms that shaped china s path in the first post mao decade china s reformers were sharply divided they agreed that china had to reform its economic system and move toward more marketization but struggled over how to go about it should china destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators with hindsight the historical record proves the high stakes behind the question china embarked on an economic expansion commonly described as unprecedented in scope and pace whereas russia s economy collapsed under shock therapy based on extensive research including interviews with key chinese and international participants and world bank officials as well as insights gleaned from unpublished documents the book charts the debate that ultimately enabled china to follow a path to gradual reindustrialization beyond shedding light on the crossroads of the 1980s it reveals the intellectual foundations of state market relations in reform era china through a longue durée lens overall the book delivers an original perspective on china s economic model and its continuing contestations from within and from without

Septic Shock

2005

this publication is intended to contribute to prevention and control of the morbidity and mortality associated with dengue and to serve as an authoritative reference source for health workers and researchers these guidelines are not intended to replace national guidelines but to assist in the development of national or regional guidelines they are expected to remain valid for five years until 2014 although developments in research could change their validity publisher s description

Foundry Management & Technology

1984

this book provides easy consultation and guidance for an appropriate understanding and management of endotoxic shock endotoxic shock results from a severe generalized inflammatory response induced by bloodstream infection with gram negative bacteria however endotoxin induced inflammatory activation may be disconnected by gram negative threats e g gram positive and yeast infections as well as occur in multiple clinical scenarios like post cardiac arrest syndrome and trauma possibly due to gut barrier dysfunction and consequent endotoxin translocation the clinical management is structured focusing and dedicating a chapter for antibiotics corticosteroids volume support vasoactive and cardiostimulating drug coagulopathy and nutritional support in addition this book is remarkable because describing polymixin b hemoperfusion points out molecular interactions and hydrodynamics of sorption each section includes brief pathophysiology principles of management key messages readers can find updated tips related to the diagnosis and management of endotoxic shock with a multidisciplinary approach drawing a pathway from endotoxin structure and source and the related pathophysiology of endotoxic shock underling the specific clinical aspect and focusing on medical clinical management of endotoxemia and extracorporeal removal the book written by international opinion leaders of this field is addressed to healthcare providers working in intensive care and represents a point of reference for intensivists infectious disease physicians nephrologists and critical care nurses involved in the management of endotoxic shock and enriched with useful downloadable material
