Popular Mechanics 2003-02 singapore's best homegrown car magazine with an editorial dream team driving it we fuel the need for speed

Official Gazette of the United States Patent and Trademark Office 2003 50 years with car and driver commemorates the golden anniversary of the most popular car magazine on the planet but more than that 50 years with car and driver tells the story of the american automobile and how the editors of the magazine witnessed that history and reported on it firsthand a look at how car and driver evolved from its beginnings as sports cars illustrated in the able hands of great automotive journalists such as ken purdy and john christy and then came into its own as the musclecar era of the sixties dawned writers such as david e davis jr brock yates and patrick bedard helped to craft a literary car magazine that drew as much inspiration from tom wolfe's writing as it did from the great cars of the day through the seventies the magazine's reputation solidified as the technical authority on new cars and the literary tradition continued with such writers as don sherman and author p j o rourke throughout the eighties the magazine prospered even when its writers went off the deep end literally getting stranded in mexico during a baja comparison test car and driver watched over the virtual rebirth of the american car during that decade with the renaissance at ford through the taurus and the revival of the corvette while keeping its lock on the strongest feature writing in the auto magazines with stories like brock yates's thirty years past observance of the death of james dean

the nineties saw car and driver continue its leadership as the world's largest selling automotive magazine from the introduction of the acura nsx and the mazda miata to the brand new mustangs and corvettes that have come in just the past years car and driver has been the authority that readers trust when it comes to 0-60 times road tests and reviews fifty years with car and driver combines classic stories from the magazine commentary by former staffers including the author vintage and modern photos of the hottest and most important cars reviewed by the magazines as well as stories from behind the scenes with all the attitude expertise and visual excitement readers have come to expect from the magazine itself book jacket

Autocar 2005 the third domain is the untold story of how the discovery of a new form of life first ridiculed then ignored for the past thirty years by mainstream scientists is revolutionizing science industry and even our search for extraterrestrial life classification is a serious issue for science if you don't know what you're looking at how can you interpret what you see starting with carolus linnaeus in the 17th century scientists have long struggled to order and categorize the many forms of life on earth but by the early 20th century the tree of life seemed to have stabilized with two main domains of life at its roots single celled and multi celled organisms all creatures fit into one of these two groups or so we thought but in 1977 a lone scientist named carl woese determined that archaea biochemically and genetically unique organisms that live and thrive in some of the most inhospitable environments on earth were a distinct form of life unlike anything seen on earth before this shocking discovery was entirely incompatible with the long standing classification of life as we know it but as it turned out archaea were not life as we know it and the tree of life had to be uprooted once again now archaea are being hailed as one of the most important scientific revelations of the 20th century the third domain tells the story of their strange potential and investigates their incredible history to provide a riveting account of an astonishing discovery
